👤 PROFILE

I graduated from the University of ANS with a master's degree in Production Engineering. With a strong background in solving complex problems using a methodical and logical approach, I have successfully completed projects that involved intricate calculations. Participating in collaborative group work for planning technological processes, I have witnessed the benefits of effective teamwork, organization, and division of labor.

In addition to my academic achievements, I have recently completed a three-month Java full-time bootcamp and after successfully completing course, I continued to gain valuable experience as a java developer working for clients and in internal projects. These experiences have allowed me to apply my skills in real-world situations, further enhancing my technical abilities.

Ready to tackle any technical challenge as a Software Developer, my solid foundation in production engineering and dedication to continuous learning drive my enthusiasm to contribute to innovative projects. From problem-solving to task execution, I am equipped to handle technical issues and support the growth of software development.

📁 EMPLOYMENT HISTORY

Java Developer Consultant at FDM Group, Kraków

November 2022 — Present

Completed a rigorous three-month full-time training as a Java Developer, gaining comprehensive knowledge and practical experience in Java programming, Java Spring Boot, SQL, MongoDB, JavaScript, and React. Implement front-end solutions using React, creating engaging and user-friendly interfaces. Continuously expand knowledge and skills through self-directed learning, staying up-to-date with the latest technologies, trends, and best practices in Java development. Currently working on web applications projects as front and backend developer.

Financial Advisor at Gravier Venture Capital, Kraków

June 2020 — October 2022

During my experience, I worked closely with clients, offering a diverse range of investment products. My strong planning and organizational skills enabled me to acquire new clients and arrange meetings effectively. Additionally, I consistently analyzed the global and stock market situation to provide clients with up-to-date insights. Through effective communication and active listening, I conducted meetings, tailored financial products to their needs, and built long-term relationships. By delivering exceptional customer service and maintaining strong interpersonal connections, I ensured a positive investment experience for clients, fostering their loyalty and satisfaction.

Sales Representative & Project Coordinator at Metalico s. c., Nowy Sącz

April 2016 — April 2020

In my role, I prepared business offers for construction products targeting contractors and investors. I presented technical details to customers, conducted price negotiations with investors, and collaborated with construction and design teams to implement projects. I excelled in problem-solving, resolving issues related to orders, projects, logistics, and cost estimates. My expertise in presenting, negotiating,

collaborating, and problem-solving has been instrumental in delivering successful outcomes in the construction industry.

Junior Production Engineer at Metalico s. c.

September 2015 — April 2016

In my role, I provided support to the engineering team in designing steel and wood constructions. Through my proficiency in using engineering software and visualizing 3D objects, I actively contributed to the design process. Participated in the design of new structures and ensured the meticulous preparation of technical documentation, always focusing on attention to detail and compliance with investor requirements. With my continuous self-improvement mindset and dedication to delivering high-quality support, I consistently contributed to the success of projects and the achievement of engineering objectives.

EDUCATION

Engineer, University of ANS, Nowy Sącz

October 2010 — January 2014

Production Engineering

Master, University of ANS, Nowy Sącz

January 2014 — August 2015

Production technologies and operation of technical systems.
